PERENNIAL GRASSES

RGT HUSTLE

FEED WHEN ANIMALS NEED IT MOST

RGT HUSTLE delivers strong growth from late winter through early spring, matching the increasing demands of livestock. This lift in homegrown feed supply helps reduce reliance on imported supplements and supports more efficient, sustainable animal production.

RAGT TRIAL RESULTS

PERSISTENT PERFORMANCE

RGT HUSTLE maintains high-quality forage through summer and into autumn, ensuring both feed supply and quality during key production months. Its low aftermath seeding promotes strong, quality, regrowth, keeping pastures productive for longer and helping you get more from every hectare.

BETTER PASTURE BALANCE

The upright growth habit of **RGT HUSTLE** allows legumes and herbs to thrive, while its diploid nature provides resilience under winter wear and summer grazing. When paired with high-performing white clovers such as RGT Quest or RGT Toby, it creates a balanced, resilient pasture mix that maintains quality and supports animal performance.

DYNAMIC DUO

RGT HUSTLE RGT18 delivers strong protection against key pests such as black beetle and argentine stem weevil, supporting lasting performance, with the added confidence of proven animal safety.
