RGT TOBBY

White clover

- Large leaf white clover
- Ideal companion for perennial grasses
- Very good frost tolerance
- Suitable for a range of farm systems

RGT TOBBY

GROW THOSE GAINS

Incorporating ***RGT TOBBY*** into grazing pastures boosts both the quantity and quality. White clover can fix up to 30kg N/ha for every 1000kg dry matter/ha grown.

RAGT WHITE CLOVERS

RGT TOBBY ***RGT QUEST***

THE PERFECT PARTNER

White clover is the most commonly used legume in New Zealand as it's well understood, reliable and suited to a range of systems. As climate and regulatory pressures increase, legumes such as ***RGT TOBBY*** white clover will continue to be fundamental for optimising farm performance.

EXCELLENT FROST TOLERANCE

Minimises the adverse effects on white clover's survival and production, particularly during late autumn or early spring frosts.
