

VERY EARLY SILAGE MAIZE

RGT PIXXON

FAO : 180 - 200

RGT PIXXON is a medium to short plant and very leafy with well filled cobs from bottom to top. It is a flint dent type.

FEED QUALITY

Energy : MEDIUM

CWD : GOOD

Starch : MEDIUM

Fibre digestibility :

The high digestibility will help dairy cows to maximise DM intake (DMI) sufficient energy enable to maintain high levels of milk production. A poor digestibility impact feed intakes and reduced the production.

A high digestible fibre in maize silage may also help to speed passage through the bio-digester for energy production.
